DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Larson.

Larson shows an apparatus comprising a spray gun body attached to a handle 11 and having a nozzle for spraying fluids and a trigger 12 having a first end pivotally and operationally attached to the gun body at 81 and having at least two grasping positions 80 and 82, wherein the handle includes at least two hand supports, in which the apparatus further comprises a bend between a first grasping position and a second grasping position of the trigger, a paint source 115 and a compressed air source 134 both attached to the gun body, a first control valve 39 operably attached to the paint source and to the trigger, and a second control valve 130 operably connected to the compressed air source and to the trigger. Regarding claim 8, one having ordinary skill in the art would recognize that when an operator moves his/her hand from a first position at 80 to a second position at 82, the distance reached by a fluid spray from the gun will increase since position 82 will further open the valves. Also, the distance reached by the fluid is predicated on the amount the trigger is squeezed regardless of the position on the trigger.
